September 2002 – June 2004

Milwaukee School of Engineering

Milwaukee, WI

Construction Management

I was enrolled in the Bachelor of Science – Construction Management program for two years. I withdrew from classes in the summer of 2004 to pursue a web design and application development path.

Course list can be view at <http://www.octoberwind.com/msoe.php>

Professional Memberships

- I earned my Microsoft Certified Professional title, as well as Microsoft Certified Application Developer and Microsoft Certified Solutions Developer with a focus on the Microsoft .NET Framework during my time at Tech Skills.
- Since October 2003, I have been a member of the Wisconsin and National chapters of the American Institute of Constructors, a professional construction society focused on ethics and continual education in the construction industry.
 - Between October 2003 and January 2004, AIC expanded their national website, with 5 State Chapter 'pilot website'. Wisconsin being one of those chapters, I played an integral role in populating the website from a template design.
 - In 2006, I rewrote the Wisconsin site myself, and moved it to my own host. I am currently redesigning the site, using PHP and MySQL to create a more dynamic, user-controllable site.
